Dear Madam or Sir ,

I did read an article in 'business week' online on innovation metrics.
The article asks a question -
How can the U.S.-and U.S. business-remain competitive?

Here are my answers and comments -

By inviting and welcoming talented people from all over the world to
come , live, and work in the US .
In this way the US will keep being the most innovative country in the world.

My personal experience as a foreign born entrepreneur and a business
owner running a company in the US , is that the current policies are
hostile towards foreign entrepreneurs.
Government officials armed with these policies are discouraging foreign
entrepreneurs who want to set up, or already operate a business in the US.

For your reference my name is Paul Arssov, and the company - ARS
Technologies .

Thank you ,
Paul .
